The legend is back—introducing the 2025 Shelby GT350!

Sixty years ago, the Shelby GT350 redefined performance, turning the 1965 Mustang into an international icon. For 2025, Shelby American has reimaged the GT350, creating the most powerful version ever with cutting-edge upgrades and design enhancements.

The 2025 Shelby GT350 features a 5.0L V8 engine, available in 480 or 810 horsepower (supercharged), paired with performance-focused upgrades in suspension, exhaust, and aerodynamics. These improvements make it a thrilling ride both on the street and the track, maintaining Shelby's commitment to high performance.

Built to deliver maximum power at an accessible price, the limited-edition GT350 is available with manual or automatic transmission. Shelby American increased horsepower by 70%, reduced weight, and fine-tuned the suspension to balance everyday comfort with track-ready performance.

In 1965, Shelby produced just 562 GT350s, and for 2025, production remains equally exclusive. Cars will begin shipping in the second quarter of the year, available through selected Ford dealers in the U.S., with a limited number of international models built by Shelby mod shops. The GT350's styling honors its legacy, with 60th anniversary badges, carbon fiber accents, and a functional aluminum hood with heat extraction.

Limited production. Secure yours today and experience a new era of performance with the 2025 Shelby GT350

Shelby Optional Parts Shown. Pricing, Parts and Availability subject to change
